

FPSL + Pioneer AI Agent

Turning accounting accuracy into strategic intelligence

The next step from the subledger

FPSL already delivers what modern finance demands: fast, compliant, and scalable accounting operations. But with expectations on finance teams growing – faster closes, deeper analysis, and always-on compliance – AI is becoming essential.

The Pioneer AI Agent is the natural extension of FPSL – and the easiest way to bring AI into your finance operations securely.

-  It runs on top of FPSL with a single ABAP transport, no need to source new technologies or spin up new cloud environments.
-  It lets finance teams work directly with data using plain language. No more digging through Excel sheets or waiting on IT.

Just ask a question like

“What are the top suspense accounts in 2025?”

and get the answer in seconds – based on real-time data from FPSL.

The interface displays a 'Raw Balance Sheet' for 'Commercial Activities' comparing 31/12/2025 and 30/11/2025. The AI Agent interface on the right shows a search for 'FPSL' and a generated response: 'Please generate raw balance sheet with data from 30/11/2025 and 31/12/2025'. Below, the 'Movement Groups' section shows a bar chart for 'Component Progress Overview' and an 'AI Agent Chain of Thought' explaining that the Commercial Activities group increased by 6.3% but remained net negative, influenced by the Fed's June 23 report signaling tighter credit standards and weaker commercial loan demand.

Benefits of the Pioneer AI agent

- ⊕ Translate manual processes into natural language.
- ⊕ Ready to use software – Implementation cost reduction of 50%.
- ⊕ Increase FTE productivity – Cut dependencies to IT teams by giving the power to the business user.
- ⊕ Easily activate AI across your business – Always current, always powered by the latest advancements with every release.
- ⊕ Maximize your AI investments – No new subscriptions needed.

Increased process efficiency by ~37% through proven use cases

01

Anomaly detection

Identify risk provisions, profit shifts, and outlier entries automatically.

02

Compliance efficiency

Generate audit-ready evidence and controls on demand.

03

Forecasting & steering

Run “what-if” simulations directly on live financials.

04

Product control

Integrate real-time market data for daily position analysis.

05

Market trace

Automates the balance sheet analysis by selecting data, extracting relevant news, understanding bank strategies, and generating structured outputs in minutes.

FPSL has streamlined and unified your accounting operations. The AI Agent can amplify that investment – adding automation, intelligence, and speed where it matters most.

Are you ready to see it in action?

We can set up your free trial – the license is on us. Reach out to our team today.
