

# SAP Pioneer Bank Finance Platform

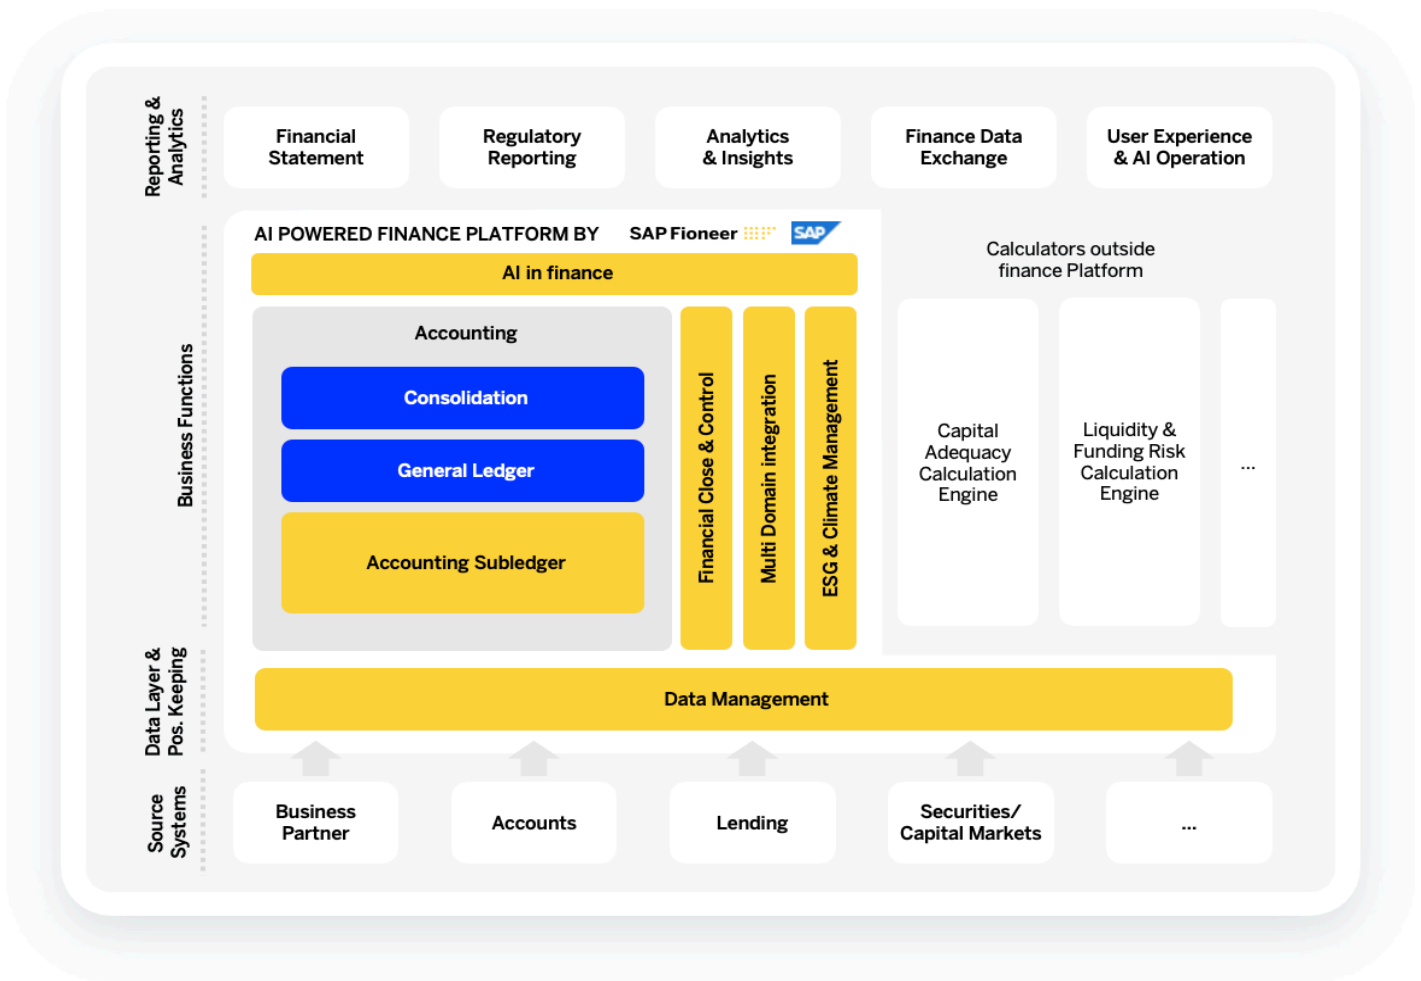

Empowering bank CFOs and their teams with a modern & unified finance platform that is efficient, compliant, future-ready.

## At a glance

With SAP Pioneer, banks can transform finance by modernizing systems, streamlining processes, and strengthening compliance by replacing legacy systems with an integrated finance platform. Backed by deep industry and technology expertise, the platform aligns with banks' cloud and AI strategies, providing a unified, future-ready foundation for financial management.

## Platform overview

Our finance platform empowers CFOs and their teams with a seamless integrated solution that combines the strength of various financial products offered by SAP Pioneer in partnership with SAP, enabling efficiency through automation, simplified reporting across finance, risk and regulatory and built-in innovation.

## Platform capabilities

AI in finance

Reduction in IT tickets from finance

**“We wanted to establish a platform with better processes, better data, and better controls. That all centered around the SAP Pioneer Financial Products Subledger and the Financial Services Data Model – one place where all the data can be gathered and controlled for everybody else to consume.”**

Global Head  
Group CFO Change and Aspire Programme Director Global G-SIB

**“With SAP S/4HANA, we are prepared for the future of banking and positioned to deliver on our promise of making life easier through intelligent and adaptable technologies”**

Peter Grebeci  
Head of Finance and ERP Competence Center, Erste Group

## Unique benefits

- 1 Trusted data through integrated and flexible architecture.
- 2 Accelerated and simplified regulatory compliance.
- 3 Granular financial data beyond accounting.
