SAP Fioneer

Is Your ESG Architecture Ready for EBA Supervisory Reporting?

At a Glance

The new EBA ESG supervisory reporting requirements significantly expand supervisory expectations across climate and nature-related dimensions, pushing many existing ESG solutions to their limits.

Beyond delivering additional reporting requirements, it creates an opportunity for banks to move from fragmented ESG reporting processes towards a scalable ESG operating model that embeds environmental risk information into risk management, portfolio steering and business decision-making.

Key Challenges

- Delivering submission-ready, controlled ESG datasets within ~14 days, not months
- Ensuring fully traceable and auditable ESG results to meet supervisory expectations
- Integrating nature-related data and assessments into existing ESG processes
- Moving from portfolio-level metrics to counterparty-level ESG assessments

ESG Value Chain

Meeting the evolving expectations on speed and granularity requires an ESG architecture that connects data, calculations and controls through to reporting, without manual breaks.

01

Source and Data Foundation

Connect internal & external ESG data

02

ESG Intelligence

Generate consistent and reusable ESG KPIs

03

Reporting and Submission

Deliver submission-ready ESG datapoints

EBA Templates Overview

SAP Fioneer provides end-to-end value chain coverage across templates, with dedicated capabilities for Climate Transition, Physical Risk and Nature - built on a common data and calculation foundation.

Intelligence Area (Templates)	Key Requirements	ESG KPI Engine*
Climate Transition (D01, D01.02, D03)	Financed emissions, physical emissions intensity, and net-zero alignment metrics	
Physical Risk (D02, D05)	Physical-risk exposure assessment across locations, properties, collateral and portfolios	
Counterparty-level Environmental Risk Assessment (D04) - NEW	Counterparty assessment of exposures above EUR 10 million, incl. risk and environmental indicators	
Sustainability Objectives (D10)	Identification of exposures contributing to climate, environmental and sustainability objectives	
Nature (Beyond Climate) - NEW (D11) **Find more details here**	Assessment of environmental impacts, ecosystem dependencies and nature-related exposures beyond climate	

***Blue icons represent where ESG KPI Engine supports the value chain**

SAP Fioneer provides software solutions for banks and insurance companies: built on rock-solid technology and bold creativity.
